React · Next.js · TypeScript · JavaScript (ES6+) · GraphQL · REST APIs · PWA / Offline-first

PROFESSIONAL SUMMARY

Frontend Developer with 3 years of experience building offline-first, mobile-ready web platforms with **React**, **Next.js** and **TypeScript** for field operations and EdTech. Track record of shipping authentication, real-time data sync, GraphQL/REST integrations and interactive dashboards used by real end users.

WORK EXPERIENCE

Frontend Developer — Andromeda (field operations app)

Oct 2025 – Mar 2026

Andromeda Tech S.A.A.

- Built and maintained a field-operations mobile web app with **React**, **Next.js** and **TypeScript**, end-to-end, focused on performance, usability and mobile adaptability.
- Implemented authentication, session management and secure integration with backend services.
- Developed **offline-first** functionality with local persistence, deferred sync and data recovery on reconnect.
- Built dynamic forms with conditional validation, progress saving and online/offline submission.
- Integrated **geolocation**, **NFC** and photo-evidence capture to validate on-site visits, plus push notifications and **PWA / Service Worker** flows.
- Consumed and integrated **REST APIs** for querying, registering and syncing operational data, following modularity and maintainability best practices.

Frontend Developer

Aug 2023 – Dec 2024

Corporación Talentum

Aulas Quindío — STEAM education platform

Jul – Dec 2024

- Built 20+ interactive activity types (quiz, H5P, drag-and-drop, infographics, flip cards) with **React** for a STEAM learning platform.
- Built full student and teacher flows: projects, adventures, learning objects (OVAs) and achievements.
- Implemented authentication with **NextAuth**, dual login (password/image) and role-based access control.
- Built a statistics dashboard with **ECharts**, advanced filters and participation/competency indicators.
- Set up multi-stage **Docker** containerization and deployment to Google Cloud Run for production.

Aulas STEAM Regional

Feb – Jul 2024

- Built responsive, accessible interfaces with **React**, **Next.js** and **TypeScript** for academic data management and reporting.
- Designed interactive dashboards and visualizations with **ECharts** (STEAM skills, 21st-century competencies, rankings).

Pertenezco — multi-role education platform

Aug 2023 – Feb 2024

- Built dynamic, responsive interfaces with **React**, **Next.js** and **TypeScript** for a multi-role education platform.
- Integrated the frontend with a **GraphQL** API via Apollo Client for queries, mutations and educational content management.
- Built an educational social-network module (posts, comments, likes) and dashboards with interactive charts and maps.
- Implemented authentication, registration and role-based route protection with **JWT**.
- Managed global state with **Zustand** and built complex forms with react-hook-form.

Level-1 Support — SIGP (Academic Management System)

Sep – Dec 2024

- Provided user support and issue triage across complexity levels 1–3 for partner schools using the platform.

Frontend Developer — Placa y Cédula

Jan 2021 – Jul 2021

Deft Soluciones Tecnológicas

- Built a public-facing tool giving citizens quick access to pandemic-era "pico y cédula" mobility restrictions.
- Designed a dynamic, intuitive interface adaptable across devices, with interactive components.

SKILLS

Core Stack: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3

UI & Styling: Tailwind CSS, Styled Components, Ant Design, Bootstrap, Framer Motion, ECharts

Data & State: GraphQL, REST APIs, JSON, Redux, Zustand

Architecture & Practices: PWA, Offline-first, Service Workers, IndexedDB, Responsive/Mobile-first Design, Custom Hooks

Tooling: Git, GitHub, Docker, Jest, Postman, VS Code, JIRA

EDUCATION

Next.js — Udemy	Nov 2024
Node / Express — Udemy	May 2023
Git & GitHub — Udemy	Jun 2021
React — Udemy	Jan 2021
JavaScript, CSS & HTML — Udemy	Jan 2021
